

Aayush Kumar Singh

New York, NY | +1 814-280-2054 | aayushsingh365@gmail.com | [LinkedIn](#) | [Portfolio](#)

EDUCATION

Pennsylvania State University

Master of Engineering in Engineering Leadership and Innovation Management

State College, PA

December 2025

Jaypee University of Engineering and Technology

Bachelor of Science in Computer Science and Engineering

Guna, Madhya Pradesh

May 2024

WORK EXPERIENCE

Modus Enterprise Transformation Platform

Remote

Management Consultant

March 2024 - June 2024

- Led value chain analysis and digital workflow optimization for three client organizations, identifying high-impact process gaps and delivering sequenced transformation roadmaps across process simplification, automation of manual handoffs, and KPI instrumentation, driving an average 10% revenue increase across portfolio clients.
- Designed SQL-to-Excel KPI dashboards tracking value realization rate, process cycle time, and decision velocity by standardizing and automating metrics across departments, reducing information lead time and accelerating leadership decision-making by 25%.
- Led end-to-end user journey analysis through remote workflow observation and Miro-based process mapping, standardizing status metrics, implementing a centralized reporting dashboard, and introducing daily standups to improve operating cadence, reducing expenses by ~20% and minimizing backlog and rework.

Raja Ramanna Centre for Advanced Technology (RRCAT)

Indore, Madhya Pradesh

Project Trainee, Product Development

June 2023 - August 2023

- Directed a cross-functional team of four to design and launch a React and Flask-based data visualization platform that centralized multi-source reporting, standardized recurring dashboards, and automated manual data preparation, reducing researcher workload by 30% and increasing user satisfaction by 35%.
- Led recurring, agenda-driven stakeholder working sessions across five cross-functional teams to refine product requirements, clarify scope and dependencies, and formalize decision ownership, implementing decision logs and dependency tracking to reduce rework and back-and-forth, accelerating delivery timelines by 30%.
- Defined milestones, managed delivery risks, and aligned engineering and product teams through clear documentation of user flows and technical constraints, reducing rework by 20% and ensuring on-time, continuous delivery.

Cojective

Bengaluru, Karnataka

Project Associate

February 2022 - August 2022

- Streamlined requirements and client feedback workflows by introducing structured intake templates within Asana, centralizing inputs across channels and reducing clarification cycles, resulting in a 30% reduction in review time and accelerating website launch timelines by an average of two weeks per project.
- Implemented a Scrum framework with one-week sprints by leading daily standups and managing a prioritized backlog in Trello, improving delivery predictability, reducing iteration duration by 20%, and increasing on-time project completion by 15%.
- Orchestrated more than twelve sprint ceremonies, including planning sessions, reviews, and retrospectives, which improved team alignment on user stories by 25% and clarified next steps to ensure timely completion of deliverables.

PROJECT EXPERIENCE

Duolingo Product Case Study

January 2026 – March 2026

- Conducted end-to-end product analysis of Duolingo using UX research, market data, and behavioral frameworks to diagnose drivers of DAU decline, designing a scalable AI solution and delivering recommendations through a deck and published article.

Stone Valley Boardwalk Trail Project

January 2025 – May 2025

- Managed a \$1.6M sustainable infrastructure project, optimizing construction sequencing and implementing accessibility and energy enhancements, resulting in completion 7 days ahead of schedule, cost variance below 0.07%, and ~20% energy reduction.

SprintSense, AI Sprint Forecasting Tool

September 2025 – November 2025

- Built an AI-driven sprint analytics platform consolidating 300+ work items across 19 sprints, leveraging Monte Carlo simulations and Agile signals to deliver 95% accurate release forecasts, improve sprint visibility by 80%, and reduce analysis time by 89%.

SKILLS & CERTIFICATIONS

Product Analysis: Product strategy, Product discovery, MVP definition, Requirements gathering, User research, User journey mapping, Market research, Competitive analysis, Go-to-market planning, Product analytics, KPI design, OKRs, Value chain analysis

Project Management: Agile, Scrum, Kanban, Sprint planning, Backlog management, User stories, Roadmapping, Stakeholder management, Cross-functional collaboration, Risk management, Delivery planning, Lean Six Sigma

Technical: SQL, Python, Data analysis, Quantitative analysis, Experiment design, A/B testing, Reporting automation, Dashboard development, Predictive analytics, Metrics standardization, Jira, Confluence, MS Project, Trello, Asana, Slack, Microsoft Excel, Power BI, Figma, Miro, Git, Streamlit, JavaScript, React JS, Flask, APIs, CI/CD, MySQL, PostgreSQL, Java, C++

Certifications: Certified Associate in Project Management (CAPM) | Siemens Mobility, Project Manager Job Simulation | Prompt Engineering for ChatGPT | Project Management Series (PJT 100) | CPE 1204 Lean Sigma Process Improvement Yellow Belt
